

Vacancy: Test Engineer m/f fulltime

We are PTI, a unique technology company with a leading position in the collection of large volumes of data, specializing in smart communicative multichannel solutions.

Our office is situated just a stone's throw away from the A12 and the station in Woerden.

Business information must be up-to-date and well-organized. This is why we develop and manage our own standardized solutions and offer these to our clients, with whom we build long-lasting, intensive relationships. We provide the majority of the utility companies in the Netherlands with several SaaS/ASP solutions.

Our increasingly innovative solutions enable us to offer our clients robust support in the execution of various work processes critical to their mission.

The slogan: 'everything right in one go' speaks for itself!

Our department is looking for an enthusiastic:

Test engineer

Job profile

This is a test engineer position within a product team;

- Together with your team, which includes a product owner and developers, you will think proactively about the testing approach and the impact of new functionalities, as well as prioritizing tasks and drawing up the planning schedule;
- You will work on the maintenance and implementation of functional testing; We will also expect you to create test cases and test scenarios independently;
- You will work on automatic regression testing;
- You will adopt a proactive attitude in order to improve the testing method and techniques;
- You must be available to start work immediately.

What can you offer?

Would you like to perform at an optimal level? Then it is important for us that you possess:

- Minimum 2 years' experience as tester;
- HBO / WO education (higher vocational or university education, preferably with a computer science component);
- Demonstrable interest in ICT;
- Good knowledge of the Dutch and English languages, both verbal and written;
- Good communication and social skills;
- A strong analytical and problem-solving capacity;
- Proactivity and assertiveness;
- Knowledge of and experience with diverse test certificates, such as Tmap and/or ISTQB;
- Experience with the test tool SoapUI ect;
- Experience with testing APIs and web services;
- A clear view of how to set up test scripts, how a DTAP (development - testing - acceptance - production) pathway works;
- Basic knowledge of databases and experience with SQL (Select, Insert, Update, Delete).

You also place demands on yourself to:

- achieve high quality results, also when under pressure;
- reach your full potential and improve the organization;
- communicate with an understanding of the wishes of the client and the user;
- quickly work independently on projects, without losing your team player mentality.

Vacancy: Test Engineer m/f fulltime

The department

Within the young, driven testing team, we have test engineers from a wide range of backgrounds. You will be warmly welcomed and we will take the time to get you acquainted with your tasks. Humour is valued within the informal atmosphere of the team. It is an open team and your opinion will be taken seriously. With a team leader who originates from within the team, you have a good sounding board who will assist you when needed. The team is part of the transition from waterfall to agile, which means you will be working in a product team. With developers, account managers and product owners all on the same work floor, the lines of communication are short and rapid changes are possible. In two-week sprints you will work towards delivering one or more products according to the DTAP pathway. Due to the many different products, the work is varied and challenging.

What can we offer?

We can offer a challenging role within our self-steering teams in a dynamic, action-focussed work environment with space to use your own initiative and to realize your own ideas.

This is achieved through:

- Varied and interesting work for diverse clients;
- Training courses for you to further develop on both a personal and professional level;
- Several times a year participating together informally in activities to support charitable causes such as '*Spieren voor Spieren*' (*Muscles for Muscles Foundation*).
- An excellent salary and employment conditions, a fantastic lunch area and a pleasant work environment with friendly colleagues.

Are you keen to join us?

Then we look forward to receiving your CV and statement of motivation by e-mail: hr@pti.nl. For more information please contact Diane Oskam, by phone: +31 (0) 348 466 888.
