

## Vacancy: Technical Frontend Developer m/f full time

We are PTI, a unique technology company with a leading position in the collection of large volumes of data, specializing in smart communicative multichannel solutions.

Our office is situated just a stone's throw away from the A12 and the station in Woerden.

Business information must be up-to-date and well-organized. This is why we develop and manage our own standardized solutions and offer these to our clients, with whom we build long-lasting, intensive relationships. We provide the majority of the utility companies in the Netherlands with several SaaS/ASP solutions.

Our increasingly innovative solutions enable us to offer our clients robust support in the execution of various work processes critical to their mission.

The slogan: 'everything right in one go' speaks for itself!

Our Innovation Department is looking for an enthusiastic front-end developer who is able to combine graphic design and technical front-ending.

Our current project concerns access authorization (think opening doors with a key card, but more advanced) and, alongside a number of background services, consists of an interactive, state-of-the-art web application which you will contribute to.

## Technical Frontend Developer

### Job profile

- Together with the product owner, you will work in a Scrum team in order to define and achieve our shared sprint goals;
- You will think proactively with the team about how we can realize the best UX;
- You will design mock-ups and wire frames that we will discuss during the sprint planning;
- Subsequently you will convert these to functional code in JSX;
- You will programme front-end JavaScript in React.JS;
- When you have time you will support the team with other activities, depending on your particular qualities (e.g. some back-end, helping with testing etc.)

### What can you offer?

Would you like to perform at an optimal level? Then it is important for us that you possess:

- A clear opinion about design and UX, combined with a pragmatic attitude;
- Minimum 4 years' practical experience with HTML(5) / CSS(3);
- Minimum one year experience in comparable roles, in a complex web-based environment;
- Advanced experience with SaaS, BAM, Responsive Design;
- Minimum one year experience with JSX and React.JS;
- Experience with Node.JS +2;
- Experience with Atlassian product suite, such as Jira and Confluence and Bitbucket +1;
- Experience with GIT;
- An enthusiastic, flexible and proactive attitude;
- The desire to continually improve yourself and the organization;
- Enjoyable hobbies alongside your work.

## Vacancy: Technical Frontend Developer m/f full time

### What can we offer?

We can offer a challenging role within our self-steering teams in a dynamic, action-focussed work environment. We also provide space for you to use your own initiative and to realize your own ideas.

This is achieved through:

- Varied and interesting work for diverse clients;
- Training courses for you to further develop on both a personal and professional level;
- Several times a year participating together informally in activities to support charitable causes such as '*Spieren voor Spieren*' (*Muscles for Muscles Foundation*).
- An excellent salary and employment conditions, a fantastic lunch area and a pleasant work environment with friendly colleagues.

### Are you the one?

Then we look forward to receiving your CV and statement of motivation by e-mail: [hr@pti.nl](mailto:hr@pti.nl). For more information please contact Robin Steeneken, by phone : +31 (0)348 466888 or by email [robin@pti.nl](mailto:robin@pti.nl)
